RE: Business reference

We are writing to extend our support of Slabworks of Montana as a member of the Marble Institute of America.

Over the past eight years we have used Slabworks of Montana on numerous custom house projects and have been completely satisfied with the stone products offered and excellent service they provide. Owner, Dave Scott has vast knowledge of different types of natural stone and has formed a team that offers high quality slab fabrication and install services. In addition, Slabworks of Montana stocks a large quantity of stone slabs allowing our customers to pick the exact countertop they want for their home.

One of those projects was our personal home. Slabworks of Montana provided the granite and marble slabs and fabrication for our kitchen and bath countertops and byzantine tile for the kitchen floor. We requested specific details on the slabs and they performed the work with absolutely no problems. The counters and byzantine floors are beautiful and the product is excellent.

We ask for your consideration of Slabworks of Montana for national accreditation in the Marble Institute of America.

Thank you,

Mike and Julie Herbst
