To Whom It May Concern:

I came into the stone industry as a salesman for a distributor of consumables 15 years ago. It was not long after beginning this journey that I had my first of many encounters with Dave Scott from Bozeman Montana. Dave had bought equipment from me until our ability to provide solutions surpassed his growing business needs. If I ever had a how to question Dave was the first person I would call. That holds true to this day.

I had a car accident in 2008 that nearly took my life. One of the first voicemails I received was from Dave Scott in Montana asking how I was and what he could do to help. Is Dave Scott a good business man and fabricator? That goes without saying. He is a better friend! Dave will be an asset to any organization!
