MIA Institute

When I was finishing construction of my home in Bozeman, I called Slabworks of Montana for assistance in selecting and installing granite countertops for my kitchen. Dave and his staff were extremely helpful in all areas: recommendation of stone types and colors, complementary stone for the chosen granite, flawless installation and customer service. I was so pleased with the results from the kitchen I purchased additional stone for my living room. I continue to receive compliments to this day. I recommend Slabworks of Montana to all my clients and friends.
